Federal Communications Commission Interference Statement

This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RATINGS:

120 VAC, 60 Hz, 15 A General Purpose, 15 A Resistive, 120 VAC 1/3 HP, 1000 W Tungsten, 500 VA Electronic Ballast, 120VAC 8.3 A Standard Ballast.

Installation Instructions

Installing the timer outdoors

Suitable for indoor/outdoor use-Store indoors while not in use. For temporary outdoor use.

NOTE:

- * Before initial use, please plug your timer for at least 30 minutes to charge the internal battery. After the LCD display appears, your unit will be ready for programming.
- * The mounting nail or screw head must extend at least 3/16 in. out from the wall (nails or screws not included).

1. Mount the timer onto a wall near a GFCI receptacle with the timer's photo sensor facing outward.
2. Hang the timer from the mounting nail or screw using the slot on the back of the unit.
3. Plug the power supply cord into the outlet.

Setting the Timer

Reset: There has a reset hole under the dashboard. Insert a pin or paperclip end into the hole to reset the timer. This will clear all programmed settings.

LCD Layout:

TROUBLESHOOTING

Problem	Solution
The lights do not turn on, even when the timer is in the "ON" position.	Ensure the lights are functional by plugging them directly into the outlet. Be sure that the lights are in the "ON" position if they have their own switch. Be sure that the outlet that the timer is plugged into is active.
The lights do not turn on at dusk.	Move the timer to another location where there is no ambient light.
The lights are flashing (turning on and off).	Move the lights away from the timer, or reposition the timer so that it does not face the lights.
